# AR Packaging optimises the boosting home deliveries with smartly constructed snack boxes

**To meet the increasing needs of packaging tailored for take away and home delivery, AR Packaging is developing a full range of sustainable solutions. Two different snack boxes are good examples of patented carton-based packaging which are ideal for these applications and can help reducing the use of plastic packaging.**

As social distancing and governmental restrictions on restaurants due to covid-19 continue, take away and home delivery demand is increasing dramatically. Food can be safely distributed directly from the kitchen to the front door of consumers who do not want to or cannot visit the restaurants. As a consequence, demands on packaging solutions adapted for this part of the hospitality sector are growing.

Two different snack boxes are examples of patented packaging developed by AR Packaging to answer on customers' increasing needs for take-away & delivery solutions. The carton-based snack boxes are perfect for different types of food & beverages to go and they are a more sustainable alternative to plastic-based packaging.

"Snack boxes is one example of our many solutions tailored for the take away and home delivery segment. We also develop customer specific packaging to meet unique requirements for product protection, branding or distribution", says Yoann Bouvet, Sales Director Food Service at AR Packaging. "Even if home deliveries are now more relevant than ever before, the need for packaging dedicated to take away and delivery will continue to grow also after covid-19 and AR Packaging has additional solutions in the pipeline to be launched within short."
